Featuring a compact design and engineered for medium- and high-volume laundries where space is at a premium, the Compact 5-in-One Ironing System quickly feeds, irons, folds, stacks and accumulates at speeds of up to 50-feet-per-minute.

COMPACT 5-IN-ONE IRONING SYSTEM
FEEDER • IRONER • FOLDER • STACKER • ACCUMULATOR

inclined feeding table

This space-saving system generates processing speeds of up to 50-feet-per-minute; is available in 24- and 32-inch diameters and 102- and 130-inch finishing widths; and features natural gas or liquid propane (LP) heat sources.

Unique in the market, the OnePress Compact 5-in-One Ironing System delivers a compact design and superior flexibility that allows medium- and high-production laundries to quickly feed, iron, fold, stack and accumulate a variety of items using up to four lanes. This space-saving system cuts labor, bolsters productivity and delivers unmatched finishing quality – all from a tiny footprint.

FLEXIBILITY IN SMALL SPACES

Engineered for high-quality finishing and maximized productivity where space is tight, the Compact 5-in-One does it all quickly and efficiently. Constructed for processing speeds of 50-feet-per-minute, the Compact 5-in-One delivers unsurpassed results in less time.

MULTI-FUNCTION CAPABILITY & CONFIGURABILITY

Configurable for one, two, or four working lanes, with one lane for sheets, two for table linens and four for small items, including napkins and pillowcases, the Compact 5-in-One boasts unrivaled flexibility and finishing quality. It delivers standard, four-lane primary folds and single or two-lane cross folds. A bypass option allows goods to exit the front or rear of the machine, and the 5-in-One offers left or right stacker orientation to meet the needs of virtually any laundry operation.

SUPERIOR PROGRAMMABILITY & EASE OF USE

Equipped with an intuitive control offering 20 pre-set and 20 customizable programs, the Compact 5-in-One provides touch-screen control over ironing parameters, faults, alarms or alterations in processing and diagnostics. The control seamlessly interacts with optional equipment ensuring unsurpassed ease of use, flexibility for multiple items, and control over item type. Operators select a program number and press start. A quick push of a button by operators automatically rejects stained or torn items, and a wide, inclined feeding table provides a better view of items while feeding.

THREE INDEPENDENT HEATING ZONES

A highly-efficient machine, the Compact 5-in-One maintains three temperature zones and a modulating heat system within the roll, always ensuring roll temperature is properly regulated for consistent heat and maximized efficiency. These modulating heat zones deliver up to a 30 percent energy savings—cutting utility costs.

BUILT FOR CONSTANT USE

Engineered for constant use and long life, the Compact offers easy maintenance, including a self-cleaning exhaust fan, and an industry leading 7/5/3-year warranty.

folding flexibility

Standard Configuration:
No bypass, 2 folds long

right or left output stacker

intuitive control

(3) modulating heat zones
